•	Planned courses for next year:		
•	Teaching assistantships done:		
•	Progress on BIOENG 2900. Provide fellowshinformation.	nip name, (anticipated) sul	omission date, and/or other relevant

## Part 2: Student expectations of advisor and lab experience

Please provide me with feedback on what I can be doing to help you more: your project, your career growth. Some ideas for what to consider when responding: What more can I be doing to aid your scientific training? Your career advancement? For example, would you prefer more direction from me? More independence? How is your workload - are you too busy, or not busy enough? Do you and I meet often enough? Would you prefer those meetings to have more focus on science, or more focus on career/development? In general, what can I be doing a better job of to guide you in your research and to help prepare you for post-graduation?

Part 3: Advisor Asse Research (thesis topic new ideas, overall pro	, future publications		quality research, abil	lity to think of and discuss
