

MEET YOUR TRANSFER PEER MENTORS

My name is Nathan Glotzbach. I am 6th year senior studying Electrical Engineering. I am from Bethel Park, PA and graduated high school in 2009. I started at California University of Pennsylvania, then transferred to Thiel College for Electrical Engineering, and then transferred again from Thiel to Pitt. I think Transfer Seminar is a great class for transfer students to take because it really gets you familiar with Pitt and helps you make friends in the process (I would know, with all my transfer experience). It's also a great place to ask questions that you don't know who else to ask. Transfer Seminar definitely makes the transfer process easier.

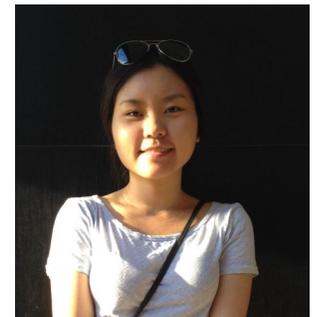

I'm Stacy Jiang and I come from China. I was a pre-pharmacy major freshman year and I transferred to the Swanson School of Engineering to study Chemical Engineering. I think transfer seminar could offer new transfers a chance to know better about SSOE, feel comfortable about their new engineering lives here and even make more engineering friends through the seminar. I would love to help new transfers to experience a smooth transition during the semester.

My name is Anna Herold. I'm from Belle Vernon, PA and graduated from high school there in 2010. I transferred from University of Pittsburgh at Greensburg after my freshman year. I'm now a super senior (9th semester) in Civil Engineering and will be graduating in December this year. Transfer seminar, while not a mandatory class, has been more helpful in my education than some of my required core classes. When I thought that nobody else would understand my transfer problems, there was always someone there going through the same thing. I even had the opportunity to make friends with peers in more advance classes with whom I could trade books and other classroom advice. Transfer seminar has made one of the biggest impacts on my college career and I can only hope that the rest of you would want to partake in a class that will improve your experience here at Pitt.
